

Titanium 12G Shotguns

Titanium 12G Shotguns

This classic highly reliable 12-Gauge Pump Shotgun in titanium is exceptionally durable and 33% lighter, while replacement barrels for legacy shotguns are 45% lighter. Whether in need of an entire new titanium shotgun or titanium replacement barrel, both greatly ease the burden-of-carry and free-up weight capacity for soldiers and law enforcement. Weight reduc-

tion further enhances performance, by increasing the speed, mobility, and ease of target acquisition and target tracking, as well as enhancing user endurance and related user accuracy.

Barrel-life is doubled and maintenance is minimized, greatly reducing long-term cost of ownership. This cost is further reduced by the combination of proprietary bore hardening,

and titanium naturally being impervious-to-corrosion. Reliable non-binding action of moving parts is ensured by proprietary titanium hardening and lubrication treatments. Barrels include low profile, integrated (3/9/12 position) titanium Tri-Keymod Accessory Mount and muzzle Stand-Off. The Tri-Keymod provides light weight, simple accessory attachment (lights, lasers, sights) directly to the front of the barrel for proper sight alignment vs. poorly skewed forend mounting. The titanium crenelated muzzle Stand-Off is lightest where it matters most at the tip of the gun and it is threaded-on allowing for use of various muzzle attachments.

FEATURES

33% LIGHTER

- 45% lighter barrel than steel counterpart
- Easier carry & comfort
- More weight-capacity for other items
- Faster target acquisition & tracking
- Increased endurance & related accuracy

2X MORE DURABLE

- Proprietary treatments double barrel life and ensure non-binding
- Impervious-to-corrosion
- Minimized care & maintenance
- Integrated Tri-Keymod Accessory Mount
- Integrated Stand-Off

33%
LIGHTER
THAN CONVENTIONAL 12G

2X MORE
DURABLE

Titanium 12G Shotguns

- All Shotgun Barrels are made entirely from 6AL4V Titanium
- Shotgun materials include 6AL4V Titanium, Steel, Aluminum, & Ballistic Polymer
- Shotguns are available in Matte Black or Titanium Finish

Titanium 12G Shotgun Specifications

Smooth, Bead

MODEL #	BARREL	BARREL LENGTH	SHOTGUN WEIGHT
AT120185A	Smooth, Bead	18.5"	4 lb 12 oz
